THE ELEVATED COMMERCIAL ENGINE

Enterprise Architecture & Value-Add Strategy // High-Ticket Acquisition

Project Scope: High-Performance Commercial Tiling Engine	**Target Market:** Tier-1 Developers, Architects, Luxury Fit-Outs
Deliverable: Next-Gen Web Architecture + Automated Pipeline	**Expected Conversion Lift:** +240% Qualified Inbound Inquiries

1. Transforming a Static Brochure into a Commercial Acquisition Engine

To position Akkari Tiling (or any ambitious commercial contractor) as the undisputed industry authority in Victoria, we do not build a template website. We engineer a **High-Performance Commercial Revenue Engine** specifically designed to satisfy the rigorous evaluation criteria of Tier 1 builders, procurement managers, and commercial architects.

2. Strategic Architectural Upgrades & Deliverables

Pillar 1: Interactive Commercial Tender & Scope Calculator

A bespoke multi-step estimation tool. Clients select their sector (Hotel, Retail, Multi-Res, High-End Home), specify estimated floor/wall square meterage, select specialized systems (large-format porcelain panels, mechanical cladding, acoustic screed), and upload architectural PDF blueprints. Provides the user with an instant estimated bracket while delivering a pre-qualified lead directly to the estimator.

Pillar 2: Sub-1-Second Headless / Modern Clean-Code Stack

Built with a cutting-edge high-performance frontend (React / Next.js or tailored lightweight WordPress engine). Zero Elementor bloat. 98+ Google Lighthouse Performance Score. WebP/AVIF image delivery, ensuring instant loading on patchy mobile connections at construction sites.

Pillar 3: High-Impact Case Study Matrix with Before/After Sliders

Transform project galleries into definitive social proof. Interactive visual before/after comparison sliders, filterable project tags (e.g., 'Hospitality', 'Retail Fit-Out'), and comprehensive technical specs (AS 3740 waterproofing details, m² tiled, completion timeline, architect credit).

Pillar 4: Automated Omnichannel Lead Dispatch & CRM Routing

Instant dual-notification architecture: When a tender is submitted, the Estimating Director receives an immediate SMS and email notification with plan attachments. The client instantly receives a branded, professional confirmation PDF with licensing credentials and corporate overview.

Pillar 5: Victorian Commercial Compliance & Trust Authority Hub

Dedicated Victorian Compliance Badging: VBA Registered Practitioner stamps, Master Builders Victoria certification, AS 3740/AS 3958 engineering standards, and $20M Public Liability certificates permanently visible above the fold.

3. Side-by-Side Strategic Comparison

Page Load Speed	**3.8s - 5.2s (Bloated Elementor)**	**0.6s - 1.1s (Sub-second Edge)**
Tender Lead Funnel	**Passive contact form**	**Interactive Scope Calculator + Blueprint Upload**
Mobile Experience	Standard responsive collapse	**Job-Site Mobile UI with Sticky Tender Bar**
Social Proof Depth	**Static photo grids**	**Interactive Before/After + Tech Case Studies**
Lead Conversion Rate	**Estimated ~1.2% - 1.8%**	**Targeted 4.8% - 6.5% (+240% Lift)**

4. Investment Tiers & Timeline

Tier 1: Commercial Pro	Complete architectural redesign, ultra-fast clean code, dynamic project matrix, compliance badging, mobile job-site UI.	2-3 Weeks	**$5,200 AUD** **($3,500 USD)**
Tier 2: Enterprise Authority Engine ★ RECOMMENDED	Everything in Tier 1 PLUS: Interactive Commercial Tender Calculator, Blueprint/PDF upload portal, Automated SMS/CRM dispatch, Interactive Before/After sliders, Victorian SEO Authority Architecture.	3-4 Weeks	**$8,800 AUD** **($5,900 USD)**
