3D PIXAR CHARACTER & AI VIDEO AUTOMATION PROPOSAL

Commercial Production Systems, Architecture & Tiered Deployment

PROPOSAL FOR: Shrief Allam	**STUDIO:** Good Brains Melbourne	**FOCUS:** 3D Pixar Automation	**STATUS:** Active Commercial Bid

1. EXECUTIVE OVERVIEW: THE AUTOMATION PHILOSOPHY

A common question in AI video production is: *'If AI video can be automated by code, why does cinematic character work still require manual tweaking?'* The answer lies in the fundamental difference between **Auteur Cinema** and a **Commercial Assembly Line**:

Production Model	Core Creative Nature	Automation Verdict
Auteur Cinema (e.g., Mazen & Mariya)	Original narrative documentary IP. Requires subtle philosophical pacing, bespoke historical documents, and nuanced emotional beats.	**Artistic Discretion (Low Auto):** Cannot automate human soul or auteur editorial direction.
Commercial Assembly Line (Daily Client Sheets)	Client sends a fixed 3D Pixar character + Voiceover. The assignment is strictly: generate the character walking, talking, or gesturing with zero face drift.	**80% AUTOMATED: Eliminates repetitive data entry, prompt typing, and seed locking.**

2. THE THREE AUTOMATION MODELS AT A GLANCE

```
[OPTION 1: THE MANUAL RECIPE (SOP & Master Prompts)]
Client Sheet ■■■ You paste into Claude ■■■ You copy prompts into Kling
(You receive the exact master prompt recipe, but you execute it manually every day).

[OPTION 2: THE CUSTOM WEB DASHBOARD (The Sweet Spot — Recommended)]
Client Sheet + VO ■■■ Drop into Private Web App ■■■ 1-Click Prompt Batch
(You get your own private web software: drop files, click generate, copy ready batch).

[OPTION 3: THE AUTONOMOUS "AI VIDEO FARM" (Zero Manual Clicking)]
Client Sheet + VO ■■■ Upload to Cloud ■■■ Code triggers Kling 4.0 APIs
■■■ All rendered .MP4 video takes automatically download to your Drive!
(The software compiles prompts AND renders the videos automatically in the background).
```

3. DETAILED PROPOSAL TIERS & SCOPE

Tier & Deliverables	What YOU Do Daily	What You NEVER Do Again	Investment & Timeline
OPTION 1: **Master Setup & SOP** • Master 3D Pixar tokens • Magnific 0.15 preset lock • Custom Claude Metaprompt • Kling 4.0 Omni-Ref setup • 30-min live walkthrough + video recording	You paste client notes into Claude yourself, copy output, and paste into Kling/Higgsfield.	No more prompt guessing. No character face drift. No wasting hours on trial-and-error.	**$150 USD** **(~7,500 EGP)** **Timeline: 2 Days**
OPTION 2: **Custom Web Dashboard** *(Recommended)* • Everything in Option 1 • **Dedicated Next.js Web App** • Drag-and-drop sheet & VO • 1-Click Claude API compilation • 1-Click Kling batch export • 30-min walkthrough + video	Open your web link, drop client file, click 'Generate', and copy the ready prompt batch directly into Kling.	**Never open a chatbot window.** Never type prompt modifiers manually. Eliminate 90% of screen fatigue.	**$350 – $400 USD** **(~17,500 – 20,000 EGP)** **Timeline: 3–4 Days**
OPTION 3: **Autonomous AI Farm** • Everything in Option 2 • **Pure Code Cloud Pipeline** • Direct Kling 4.0 API dispatch • Headless cloud rendering • **Auto-download .MP4s to Drive**	Literally just open your Google Drive folder, take the pre-rendered video takes, and drop into Premiere Pro!	**Never touch Kling or Midjourney.** Never wait on rendering screens. Zero manual asset generation.	**$750 – $850 USD** **(~37,500 – 42,500 EGP)** **Timeline: 7–10 Days**

4. MASTER FEATURE COMPARISON MATRIX

Feature / Capability	Option 1: Master SOP	Option 2: Web Dashboard	Option 3: Full AI Farm
Character Consistency Anchor	Yes (Manual)	Yes (Automated)	Yes (Automated)
Kling 4.0 Omni-Reference	Yes	Yes	Yes (API-Driven)
Private Web App Interface	No	**Yes (Next.js)**	**Yes (Next.js)**
Daily Time Spent by You	~45 Minutes	**~10 Minutes**	**~2 Minutes**
Prompt Compilation	Manual in Chat	**1-Click Auto**	**1-Click Auto**
Video Rendering Action	You paste & click	You paste & click	**Automated in Cloud**
Asset Auto-Download to Drive	No	No	**Yes (Automatic)**
Live 1-on-1 Walkthrough	Yes (30 Min)	Yes (30 Min)	Yes (45 Min)
Screen-Recorded Tutorial	Yes (Loom/MP4)	Yes (Loom/MP4)	Yes (Loom/MP4)
Investment	**$150 USD**	**$350 – $400 USD**	**$750 – $850 USD**
Delivery Timeline	2 Days	3–4 Days	7–10 Days

5. WHAT IS A '1-ON-1 WALKTHROUGH & RECORDED HANDOVER'?

To ensure you are never left stuck, guessing, or feeling unsupported, every option includes our comprehensive onboarding package:

- **Live Screen-Share Walkthrough (Google Meet / Zoom):** A private 30-minute video session where we share screens, walk you through every button and setting, and watch you run your first real client sheet through the system live.
- **Permanent Recorded Video Tutorial:** The entire session is recorded in HD and handed to you as a permanent video file (MP4). If you ever need a refresher 3 months from now, you rewatch your private tutorial instead of calling or feeling lost.
- **Post-Deployment Support:** Dedicated WhatsApp / Telegram direct channel for 14 days following delivery to answer any operational questions.

6. HOW WE GET STARTED (4-STEP ONBOARDING ROADMAP)

Step	Action Item	Responsible Party & Target Time
Step 1	Select your preferred deployment option (Option 1, 2, or 3).	Shrief Allam • Day 1
Step 2	Send 1 sample client character sheet and 1 sample voiceover MP3.	Shrief Allam • Day 1
Step 3	Good Brains builds the architecture and tunes the prompt/pipeline engine.	Good Brains Studio • Days 2–4
Step 4	Live 1-on-1 walkthrough call, test run on real client files, and video handover.	Joint Session • Handover Day

READY TO START?
To deploy your chosen automation tier, simply reply with your preferred option (Option 1, 2, or 3).
We begin architecture deployment immediately upon confirmation.
