EXECUTIVE SUMMARY

Senior Systems Architect and Full-Stack Engineer translating 20+ years of high-precision industrial telemetry and data networks (Baker Hughes, Halliburton) into modern web architecture, real-time database infrastructure, and agentic AI automation. Specialized in building decoupled, high-performance headless frontend architectures with end-to-end type safety (**TypeScript, Next.js 16, React 19, Three.js 3D Spatial Web**) integrated with scalable cloud backends (**Supabase / PostgreSQL WebSockets**) and automated AI CRM workflows (**Google Gemini API, n8n, Twilio**). Bypasses framework bloat to deliver resilient, strictly-typed, sub-second interactive systems designed for enterprise scale.

TECHNICAL PROFICIENCIES & ARCHITECTURAL TOOLKIT

TypeScript & Modern Frontend: **TypeScript (Strict Typing, Generics, Zod)**, Next.js 15/16 (App Router, Server Actions), React 19, Three.js, React Three Fiber, WebGL, Tailwind CSS.	**Backend & Real-Time Data:** Supabase (PostgreSQL, Row-Level Security, WebSockets), Firebase, Python, Node.js, RESTful & GraphQL APIs, Redis caching.
Headless Commerce & Payments: Multi-currency payments (Stripe, Paymob), Shopify Storefront API, Salla webhooks, Decoupled Headless CMS (WordPress/Contentful REST & GraphQL into Next.js).	**AI & Industrial Systems Engineering:** Google Gemini API, event-driven n8n webhooks, Twilio APIs, mission-critical telemetry (Baker Hughes/Halliburton), CI/CD (Vercel, GitHub Actions).

FEATURED ARCHITECTURAL SYSTEMS & PRODUCTION DEPLOYMENTS

The Vista Booking Engine — Enterprise Glassmorphism SaaS Platform

Lead Systems Architect & Full-Stack Developer | Remote

- Architected a full-stack **TypeScript & Next.js 16** zero-commission luxury booking engine featuring a custom dark-mode Glassmorphism UI.
- Integrated end-to-end type-safe data contracts, real-time bilingual LTR/RTL routing, Paymob payment gateway, and event-driven n8n webhook pipelines.
- **Live Application:** https://the-vista-booking-engine-vb2y.vercel.app

Auto-Bath Detailing — Interactive 3D Spatial Web Application

Lead 3D Spatial Architect & Frontend Engineer | Melbourne Client Spec (Remote)

- Engineered an interactive 3D WebGL automotive showcase with realistic procedural materials, orbital camera controls, and Stripe payment integration.
- Designed high-velocity responsive booking workflows connected to dynamic live pricing tiers.
- **Live 3D Platform:** https://auto-bath-detailing-melbourne.vercel.app/showcase

AI Multimodal Emergency Dispatcher & Facility Manager

Lead AI Systems Architect | Remote

- Engineered an autonomous backend that intercepts natural-language voice/text via WhatsApp, classifies priority via Google Gemini, and updates a live operator dashboard in real-time via Supabase WebSockets.

PROFESSIONAL WORK EXPERIENCE

GlobeVistaHub / GoodBrains Studio — Founder & Lead Systems Architect

2021 – Present | Hurghada, Egypt & Remote

- Direct architecture and full-stack implementation of Next.js web applications, headless commerce, and AI integrations for global clients.

Multinational Oil & Gas Telemetry (Baker Hughes, Halliburton, Weatherford)

General Production Logging Engineer & Project Manager | 2000 – 2020 | Middle East & International

- Managed multi-million-dollar sensor telemetry and mission-critical telemetry data across high-pressure field operations.
- Directed operational real-time directives for tier-1 enterprise operators (ARAMCO), ensuring 99.99% system reliability.

EDUCATION & CREDENTIALS

B.Sc. in Communication & Systems Engineering — Arab Academy for Science & Technology (1995 – 1999)
Diploma in IT & Computer Science — Arab Academy for Science & Technology (1999 – 2000)
